## Meeting the Army's C4ISR needs...

The CECOM Office of Small Business Programs provides the information and resources needed for targeted organizations to become eligible to conduct business with CECOM and the C4ISR (command, control, communications, computers, intelligence, surveillance and reconnaissance) Materiel Enterprise partners.

Our small business specialists seek to ensure a fair portion of contract awards and a percentage of total U.S. business dollars are placed with organizations within the below **socioeconomic program areas**:

- Small Business;
- Historically Black Colleges, Universities and Minority Institutions;
- HUBZone Small Business;
- Service-Disabled Veteran-Owned Small Business;
- Small Disadvantaged Business;
- Women-Owned Small Business.

The C4ISR Materiel Enterprise originates from a partnership between the U.S. Army Materiel Command (AMC) and the Assistant Secretary of the Army for Acquisition, Logistics and Technology (ASA/ALT). AMC and ASA/ALT contributes three member organizations, which are collectively responsible for the life-cycle of C4ISR systems.
